

# Mission Statement

Artifcts is creating a purpose-driven community empowering us all to capture and preserve the objects of our lives and our stories. Artifcting helps us contextualize our life experiences, meaningfully connect with others, and ensure our personal legacies and the pieces even of world history that we possess and contribute to live on.

Artifcts strives to be the ambassador for the humanity within all of the 'stuff' we collect and accumulate as we live. We discover this humanity when we pass down stories and not just things.

We believe life experiences, contributions, and accomplishments are far too scattered and easily forgotten. In this world of chaos, we are forced to make compromises in terms of personal privacy and security. We can and are doing better for individuals, family, and society in a new Human Media 1.0 model that places your privacy and security first. We empower our community to make decisions about their stuff and stories that make sense for them. Through this endeavor, we seek to also contribute to the sustainable development of social media platforms.

We want to help people to uncover and preserve objects with market value that can help families of all socio-economic backgrounds build wealth over time as new artifacts and old (family heirlooms!) pass from family member to family member.

Wherever you are, whenever you are, we want your Artifcts to be a part of your life as well as that of your friends, family, and community - local to global!
